FULL-STACK ENGINEER | TYPESCRIPT, NODE.JS, VUE.JS

Full-Stack Engineer with 6+ years of remote-first experience building scalable SaaS, e-commerce, and AI-powered products. Proven track record of end-to-end ownership using TypeScript, Node.js, Vue 3, and PostgreSQL to deliver reliable, high-traffic systems serving thousands of daily users.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL

Frontend: Vue.js (Vue 2/3), Nuxt.js, Vuex, Pinia, Vue Router, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, GraphQL, Webhooks, Authentication & Authorization, OpenAPI

Databases: PostgreSQL, MySQL, MongoDB

Cloud & Infrastructure: AWS S3, Cloudflare, Docker, CI/CD, GitHub Actions

Architecture: Microservices, Event-Driven Systems, API Design, System Design

Tools: Git, GitHub, Bitbucket, Postman, Storybook

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Remote Contractor) | *Leaders.org (formerly C-Suite Circle)* Aug 2020 - Present

- Built and maintained high-traffic production SaaS applications using TypeScript, Vue 3, Node.js, GraphQL, PostgreSQL, and AWS to support 50,000+ active users.
- Developed scalable social platform functionality for Clouthub including profiles, content feeds, engagement systems, and real-time updates for 25,000+ daily active users.
- Maintained and optimized the Kaizen platform, managing backend architecture and APIs to reliably process over 15,000 monthly e-commerce orders for screen protectors.
- Designed and implemented TypeScript-based backend services and APIs supporting AI-powered workflows, content analysis, and media processing, reducing manual operational time by 40%.
- Built microservice-based systems and developer-facing APIs documented using OpenAPI specifications.
- Developed deployment automation workflows integrating GitHub and Bitbucket repositories with cloud infrastructure, accelerating release cycles by 30%.
- Built internal business tools supporting transaction management, reporting, exports, and operational workflows.
- Contributed to a shared Storybook component library used across multiple products and teams.

Frontend Developer | *Instoried*

Sep 2019 - Aug 2020

- Developed analytics dashboards and reporting interfaces using Vue.js and Chart.js.
- Built a Chrome extension integrated with the company platform for sentiment analysis workflows.
- Implemented secure authentication and authorization systems.

INDEPENDENT E-COMMERCE PROJECTS

Full-Stack Engineer and Creator

2021 - Present

- Built and operated production e-commerce platforms (ubersam14store.com, crochika.com, mfsstore.in, konpkay.com) serving 5,000+ daily users.
- Processed 100,000+ customer transactions through automated fulfillment and payment workflows.

- Developed full-stack applications using TypeScript across both frontend (Vue/Nuxt) and backend (Node.js/Express).
- Designed secure payment systems integrating multiple payment gateways, QR payments, transaction monitoring, and reconciliation.
- Developed reseller APIs enabling third-party partners to automate order fulfillment and business operations.
- Built webhook-driven automation systems that reduced manual operational effort by over 80%.
- Created WhatsApp-based automation systems for customer support and digital product delivery.
- Implemented wallet infrastructure supporting deposits, balances, withdrawals, and multi-provider payment processing.
- Engineered OTP-based authentication systems for phone and email verification.
- Implemented Cloudflare security controls including DDoS mitigation, bot protection, rate limiting, reCAPTCHA, and fraud prevention.
- Managed infrastructure, deployments, monitoring, incident response, and production reliability.

CERTIFICATIONS & EDUCATION

- **FinOps Certified Practitioner** (FinOps Foundation)
- **Bachelor of Technology in Computer Science & Engineering**, Assam University
